Notice No. 15

Orphan Well Association
Operations in City of Calgary

October 23, 2017

Lexin Orphan Operations 00/10-13-022-29W4/0

Saturday, October 21, 2017 – Remedial cementing operations continued on the last coal interval to isolate geological formations. Cardium, Milk River, Judith River zones and three CBM Coal sections have been cement squeezed. The base of groundwater protection will also be isolated with a remedial cement squeeze.

Sunday, October 22, 2017 – A remedial zone was re-perforated and will be acidized in an attempt to achieve a more comprehensive cement squeeze.

Monday, October 23, 2017 – Remedial operations continued and will be completed in the next few days. Pending results of these operations a cement job will be conducted to complete the downhole abandonment.

PLANS – Perforate casing, establish feed rate or circulation to surface, conduct remedial cement repair.
